Materials for DM/25/1753: Tanyard Manor, Horsted Lane, Sharpthorne, East Grinstead, West Sussex, RH19 4HY

Paving to Steps

To be riven 22mm Indian sandstone in Raj green blend in mixed formats to random pattern available from:

See link and image below:

<https://spirestonemill.co.uk/>

Risers to steps

To reuse the existing red brick

Face finish to new retaining wall

The new retaining wall will be finished to match the existing walls (see below) which comprise a mix of random and coursed Wealden sandstone in a mix of sizes and formats but with a loosely defined series of lacing courses comprising more regularised stone with lime rich mortar and pointing set back from the face of the stones. There do not appear to be any galletting/pinnings. The head is coped in stone laid slightly to fall.

Figure 1 existing wall

The client is sourcing reclaimed stone from local suppliers.

The following company have provided this sample from their stock.
