Dear Steven and Planning,

Building upon my objections, concerns and challenges within the email attachment sent within the email below I would like to add the attached 11 photographs' of my garden (19 Woods View RH10 4BE) at 0800 hours this morning after some overnight rain.

What I should highlight is that the flooding appears to be getting worse as the flooding seems to be occurring with increased frequency and it seems to take less rain to bring about flooding!!!

You should also note that it not only affects and impinges upon my entire garden area with parts under inches of water but also the pathways around the property as the water seemingly has nowhere to go.

Please ensure that these photographs and supporting comments are captured within the feedback as the flooding and drainage situation will get much worse should the build go ahead as is.

Renewed thanks as ever...

Stephen McNamee

Dear Sir or Madam,

I've received an out of office message from the email below asking me to forward the attachment and email onto your email address. I hope that this is helpful.

Thanks as ever steve

Dear Steven King,

Please find my attached response, which I could expand on much further but sadly time is against me this week.

I presume that the council will disguise identifiable details when such a response is made public.

I hope that this response and others are seen as helpful and constructive and will be more than listened to as actually heard and acted upon.

With renewed thanks as ever steve
