[REDACTED]
Dear Madam

Application No. DM/26/1146

Proposal: Replacement radio mast and antenna

Location: The Lynns, Turners Hill Road, Crawley Down, Crawley

My Property: 66 Squires Close, Crawley Down, RH10 4JQ

With regards to your notification of Planning Application dated 12.08.26 showing additional photographs of the permanent footings and specifications of the mast, I wish to reiterate my objections contained in my original objection letter of 01.06.26. Worth Parish Council have also already objected to the Planning Application on 08.07.26.

At the time of writing, the aerial has been retracted for a few days but for at least a week previously it was extended. Please see attached extension and retraction photos taken from my property showing visually how obtrusive and overbearing the structure is. These photos do not include the proposed vertical aerial extension of the mast/antenna/aerial which would give a total unacceptable height of about 64 feet. This is too prominent and not in keeping with the character of the surrounding neighbourhood and is so close to my property that it would spoil my enjoyment of my property. Also, there is no mention of the width dimensions of the retracted or extended aerial, which are both visually in my opinion unacceptable. I, therefore, strongly object to the Planning Application in its entirety.

Yours faithfully
