Dear Sir,

We are raising a formal concern that this further extension could take away more morning light; moreover, from the rear, increase its fill of the skyline and dominate with its presence with regards to overlooking the neighbouring gardens.

40 Gander Hill is a very large modern building, its bulk and cumulative design completely unlike any other in the immediate area – and it has already been substantially extended.

Fundamentally, we are extremely concerned about a major 2nd story rear extension setting a precent, which others on Gander Hill could then potentially follow; thus, substantially altering the character and nature of the Gander Hill environs.

And we would kindly ask that light and outlook considerations should be duly part of the extension application process.

Yours sincerely,

[REDACTED]
