Customer Details

Address: 6 Upper St Johns Road Burgess Hill

Comments Details

Commenter Type: Neighbour or general public

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: I am writing as the occupant of 6 Upper St Johns Road, a homee directly adjacent to the Park Centre. I am writing to formally object to the revised planning permission to refurbish and upgrade the Park Centre, which I believe will have an adverse impact not only on my home, but also on other surrounding homes in the local area. There are several reasons why I am objecting to the

planning permission, which I will outline below.

1. Parking and Traffic Concerns:

Firstly, I note from the plans to amend the property is that the Park Centre will be able to hold 335 occupants at any given time. This seems like a very high number of people and raises serious concerns about parking availability in the area, especially due to the existing lack of parking in the nearby neighbourhood. Whilst I acknowledge there is some parking on the nearby roads, these roads are already very full of vehicles during working days where others are choosing to park due to a lack of alternatives. The plans to increase the capacity of this property will further exacerbate the lack of parking in the area, and the six parking spaces allocated to the Park Centre are grossly insufficient to accommodate the volume of visitors expected and thus this increase in visitors will exacerbate this existing issue, causing disruption for residents and creating potential safety hazards.

2. Noise Disturbance:

In addition, I note that two garden areas are being proposed directly behind my properties. These will inevitably generate a constant hum of activity and noise during the operating hours of the centre. Unlike occasional noise, this will be a persistent source of disruption throughout the day, further undermining my ability to enjoy the peace and quiet of my homes and gardens. I am concerned about the excessive noise which will come from the property.

Firstly, there will be excessive noise from construction works on the property to make the suggested changes, to which I have not been provided with an estimated duration of how long the construction works would last.

Secondly, operational noise; having a busy centre with so many occupants next to my properties is likely to be very noisy, particularly due to the plans to have an open garden area right next to where my gardens are. I am deeply concerned that this will have an impact on my ability to enjoy a peaceful residence of my homes due to the noise, especially given the nature of the visitors to the property, many of which will be children who will not have the social etiquette or respect to be mindful of their noise or actions. This is made worse when these occupants will be encouraged through an outside space which is directly adjacent to my property and garden.

3. Loss of Privacy and Security Risks:

The proposed outdoor garden area and the current design of the property raise concerns about both privacy and security. The plan to have a garden area which is adjacent to my gardens and fences is concerning for me. Our gardens are already very overlooked by the property, particularly with the rear upper floor,

which has several windows stretching across with no blinds or curtains, meaning anyone who is looking out can see directly into my gardens and living rooms. The plans to have a garden area so close is likely to not only generate a lot of noise and overlook my gardens, but I am also concerned by the ability for individuals to be able to look over my fence into my gardens as well as a fear for individuals to be able to jump over my fence into my properties. This is both a security concern and a fear of my right to privacy. Whilst I object to the placement of the gardens, I would suggest that if this objection was not upheld, that the applicants placed trees or a higher fence next to my gardens on the rear side to minimise the lack of privacy and noise to my properties, which would act as noise cancellation and increase privacy. Additionally, with the increased number of occupants in the building, I would want steps to be taken to reduce the ability for occupants to look into my gardens by having curtains or blinds in the upper floor windows.

4. Overdevelopment of the Property:

Notwithstanding the above, I believe that the plans for the property are overbearing for my homes and generally overdeveloped. I have no objections to the planned aesthetic changes, as I believe that this will fit in with the neighbourhood, but having such a development in a quiet residential road, so close to residential homes, is overbearing. Looking at the property plans, I also have some concerns that the increased size and building works of the property will affect the (already limited) natural light I get into my gardens and generally affect my reasonable enjoyment of the property.

5. Additional Structures Impacting Light and Outlook:

I also object to the proposed construction of a shed to store timber and cladding materials. According to the plans, this shed will be 2.5 metres in height and 3.1 metres in length. This structure will clearly rise above the height of my existing fence and will significantly impact my garden by blocking natural light. This not only diminishes the enjoyment of my outdoor space but also adds to the overbearing effect of the overall development. The placement and scale of the shed are not appropriate for a site so closely bordered by residential gardens.

In summary, I object to the proposed refurbishment and expansion of the Park Centre on the grounds of insufficient parking, noise disturbance, loss of privacy, security concerns, and the overbearing nature of the development. While I understand the need to modernise facilities, the scale and impact of this proposal are incompatible with its location in a quiet residential area.

I appreciate your consideration of my concerns and trust that

these objections will be given due light in the planning process.

Best regards,

Simon

Kind regards
