Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Mid Sussex District Council planning decisions with regard to potential ecological impacts from development.

Application: DM/25/2716
Location: Wickenden Manor Chilling Street Sharpthorne East Grinstead
Proposal: Proposed three storey extension to provide further accommodation, meeting rooms and kitchen. Extension and change of use of stables to create further accommodation. Erection of conservatory to Lodge. New hard surface basketball and tennis court. Installation of solar panel arrays within the walled garden. (Amended plans received 31 July 2026)

Thank you for re-consulting Place Services on the above full application.

No ecological objection	☐
No ecological objection subject to attached conditions	☐
Further information required/Temporary holding objection	☐
Recommend refusal	☐
Subject to Natural England's formal comments on the conclusion of the LPA's Appropriate Assessment	☐

Summary

We have reviewed the additional information submitted and do not consider there will be any additional impacts on ecology, other than those identified in our response dated 16th December 2025.

Impacts will be minimised such that the proposal is acceptable, subject to the conditions below based on BS42020:2013.

For clarity, we have shown the conditions below which we recommend for submission for approval. Implementation of the details below should be a condition of any planning consent. However, this does not include the previously recommended HMMP condition, as Mid Sussex does not consider that significant on-site enhancements for minor development. Therefore, we are satisfied that the HMMP condition is not required for this application.

Recommended conditions

1. ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS

“All mitigation measures and/or works shall be carried out in accordance with the details contained in the Bat Emergence and Re-Entry Surveys (Arbtech Consulting Ltd., August 2025) and Preliminary Ecological Appraisal and Roost Assessment (Arbtech Consulting Ltd., June 2025) as already submitted with the planning application and agreed in principle with the local planning authority prior to determination. This includes the non-licensed Precautionary Method Statement for Hazel Dormouse and the Precautionary Method Statement for reptiles and mobile protected and Priority species in the Preliminary Ecological Appraisal and Roost Assessment (Arbtech Consulting Ltd., June 2025). This avoids impacts on European Protected Species and protected species.

This will include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details.”

Reason: *To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).*

2. PRIOR TO COMMENCEMENT OF ANY WORKS WHICH WILL IMPACT THE BREEDING / RESTING PLACE OF BATS: SUBMISSION OF A COPY OF EPS

MITIGATION LICENCE OR EVIDENCE OF SITE REGISTRATION UNDER A BAT MITIGATION CLASS LICENCE FOR BATS

“Any works which will impact the breeding / resting place of bats, shall not in in any circumstances commence unless the local planning authority has been provided with either:

- a) a licence issued by Natural England pursuant to Regulation 55 of The Conservation of Habitats and Species Regulations 2017 (as amended) authorizing the specified activity/development to go ahead; or*
- b) evidence of site registration supplied by an individual registered to use a Bat Mitigation Class Licence; or*
- c) a statement in writing from the Natural England to the effect that it does not consider that the specified activity/development will require a licence.”*

Reason: To conserve protected species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s17 Crime & Disorder Act 1998.

3. PRIOR TO ANY WORKS ABOVE SLAB LEVEL: BIODIVERSITY ENHANCEMENT LAYOUT

“A Biodiversity Enhancement Layout for biodiversity enhancements listed in the Preliminary Ecological Appraisal and Roost Assessment (Arbtech Consulting Ltd., June 2025) shall be submitted to and approved in writing by the local planning authority.

The content of the Biodiversity Enhancement Layout shall include the following:

- a) detailed designs or product descriptions for biodiversity enhancements; and*
- b) locations, orientations and heights for biodiversity enhancements on appropriate drawings.*

The enhancement measures shall be implemented in accordance with the approved details prior to occupation and all features shall be retained in that manner thereafter.”

Reason: To enhance protected and Priority species & habitats and allow the LPA to discharge its duties under paragraph 187d of NPPF 2024 and s40 of the NERC Act 2006 (as amended).

4. PRIOR TO OCCUPATION: WILDLIFE SENSITIVE LIGHTING DESIGN SCHEME

“Prior to occupation, a “lighting design strategy for biodiversity” in accordance with Guidance Note 08/23 (Institute of Lighting Professionals) shall be submitted to and approved in writing by the local planning authority. The strategy shall:

- a) identify those areas/features on site that are particularly sensitive for bats and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory, for example, for foraging; and*
- b) show how and where external lighting will be installed so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their breeding sites and resting places.*

All external lighting shall be installed in accordance with the specifications and locations set out in the scheme and maintained thereafter in accordance with the scheme. Under no circumstances should any other external lighting be installed without prior consent from the local planning authority.”

Reason: To allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

Biodiversity Gain condition

Natural England advises that the biodiversity gain condition has its own separate statutory basis, as a planning condition under [paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990](#). The condition is deemed to apply to every planning permission granted for the development of land in England (unless exemptions or transitional provisions apply), and there are separate provisions governing the Biodiversity Gain Plan.

The local planning authority is strongly encouraged to not include the biodiversity gain condition, or the reasons for applying this, in the list of conditions imposed in the written notice when granting planning permission. However, it is highlighted that biodiversity gain condition could be added as an informative, using [draft text](#) provided by the Secretary of State:

“Biodiversity Net Gain

The effect of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission granted for the development of land in England is deemed to have been granted subject to the condition “(the biodiversity gain condition)” that development may not begin unless:

- (a) Biodiversity Gain Plan has been submitted to the planning authority, and*
- (b) the planning authority has approved the plan.*

The planning authority, for the purposes of determining whether to approve a Biodiversity Gain Plan if one is required in respect of this permission would be Mid Sussex District Council.

There are statutory exemptions and transitional arrangements which mean that the biodiversity gain condition does not always apply. These are listed in paragraph 17 of Schedule 7A of the Town and Country Planning Act 1990 and the Biodiversity Gain Requirements (Exemptions) Regulations 2024.

Based on the information available this permission is considered to be one which will require the approval of a biodiversity gain plan before development is begun because none of the statutory exemptions or transitional arrangements are considered to apply.”

Please do not hesitate to contact us if you have any queries in relation to this advice.

Yours sincerely,

Hamish Jackson ACIEEM BSc (Hons)
Senior Ecological Consultant
 Place Services at Essex County Council

Place Services provide ecological advice on behalf of Mid Sussex District Council.
