Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I am writing to formally express my serious concerns regarding the proposed housing development of 42 new homes on the land off Dunnings road. Due to the existing drainage and infrastructure limitations in this area, I am worried that the current systems will not be sufficient to cope with the additional surface water and wastewater generated by a new housing estate. My property in Stockwell road has

already experienced flooding in 2025 with water entering my property through the wastepipe line and toilets leaving us to move out for 3months due to hygiene reasons with children, and I believe that further development will significantly increase the risk of flooding again.

I would appreciate clarification on what assessments have been carried out to ensure that the current infrastructure can safely manage the increased demand, and what measures will be put in place to prevent flooding or water damage to my property again?

I would love to hear your response

Kind regards
