[REDACTED]

Hello again Deborah,

Just a quick addition to my objection to The Byre development in Bolney.

Yesterday we had the fire brigade in the village looking for fire hydrants in relation to a different development. Having spoken to the fire brigade representative, he confirmed that fire engines/emergency services would NOT be able to access the Byre development due to distance from the road/hydrant and the lack of a turning place.

So it seems that emergency cover for the proposed 5 houses would be impossible. I assume this is pertinent to your evaluation?

As is any related water supply, which is regularly not cut off in Bolney.

Many thanks,
