You don't often get email from [REDACTED]

Dear Deborah

We would like to object to above planning application for 12 Marchants road.

We have viewed the plans provided by the applicant and our main concern is the height of the rear extension and how close it is to our boundary.

The proposed extension looks to obstruct most of our daughter`s bedroom window and block the light of our south facing elevation which would bring darkness into not just her bedroom but also our hallway.

We have tried to measure the height of the extension from the plans provided and believe the building will block most of the light (with extended eaves) which will potentially devalue our property and effect lighting in front part of the house.

We would like you to consider this when making a decision and consider our right to light .

We have attached few pictures with a marking post to reflect how high we believe the extension will be . The plans available have no measurements submitted and the applicant was not able to provide exact measurements to us therefore we have measured this to our best abilities from the scale of the plan provided. The top of the post represents the top of the rear corner of the extension.

We are looking forward hearing from you soon.

Kind regards
