Thank you for requesting advice on this discharge of condition from Place Services' ecological advice service. This service provides advice to planning officers to inform Mid Sussex District Council planning decisions with regard to potential ecological impacts from development.

Application:	DM/26/0862
Location:	Land Adj. To Rocky Lane Haywards Heath West Sussex
Proposal:	Discharge of Biodiversity Net Gain Condition 1 relating to planning application DM/25/1495

Thank you for re-consulting Place Services on the above discharge of condition for the Biodiversity Gain Condition

Biodiversity Gain Condition

This permission is considered to be one which will require the approval of a biodiversity gain plan before development is begun (which includes demolition) because none of the statutory exemptions or transitional arrangements are considered to apply.

Comments

We have reviewed the submitted documents for this application. This includes the following:

- Cover Letter (Avison Young Ltd)
- Biodiversity Gain Plan form
- Biodiversity Gain Plan Report (Adapt Environmental Ltd, March 2026)

- Allocation Agreement
- Statutory Biodiversity Metric – Calculation Tool

It is indicated that [Paragraph 14\(2\) of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#) and [Articles 37C\(2\) and 37C\(4\) of The Town and Country Planning \(Development Management Procedure\) \(England\) Order 2015](#) sets out the requirements of the Biodiversity Gain Condition, which secures a 'Biodiversity Gain Plan'.

Therefore, in summary, the submission of a Biodiversity Gain Plan will consist of the following information:

- Biodiversity Gain Plan form, using the Government's template: <https://www.gov.uk/government/publications/biodiversity-gain-plan>
- The completed metric calculation tool showing the calculations of the pre-development and post-intervention biodiversity values.
- Completed pre-development and post-development habitat maps
- Information regarding [Habitat degradation](#) (where required).
- Information regarding [Irreplaceable habitat](#) (where required).

In addition, the following information may also be required depending on whether the development contains significant on-site enhancements or whether off-site options or Statutory Biodiversity Credits are required:

- A [Habitat Management and Monitoring Plan](#) (HMMP) for significant on-site enhancements or offsite measures in blue line boundary land.
- Legal agreement for monitoring and management of significant on-site enhancements or off-site measures in blue line boundary land.
- Evidence of off-site units being allocated to a Biodiversity Gain Site on the [Biodiversity Gain Site Register](#).
- Evidence of proof of purchase of Statutory Biodiversity Credits

Therefore, based on the submitted documents, we are not satisfied that sufficient information due to the following reason:

- A revised Statutory Biodiversity Metric – Calculation Tool with off-site units tabs completed has still not been submitted to support the application. This is necessary to clearly demonstrate that off-site units are sufficient to ensure that a 10% measurable biodiversity net gain can be achieved. Nevertheless, we can see that 0.2 habitat units are required to meet the unit deficit and 0.2 habitat units of Other Neutral Grassland have already been allocated to a Biodiversity Gain Site (BGS-290224001). Therefore, this should reassure the LPA that Biodiversity Gain Condition will be able to be discharged, subject to this minor update to the metric.

Recommendation

We are unable to recommend the discharge of the Biodiversity Gain Condition until the additional information outlined above has been provided.

Please do not hesitate to contact us if you have any queries in relation to this advice.

Yours sincerely,

Hamish Jackson ACIEEM BSc (Hons)
