**Subject:** Planning Application DM/25/3129 Land at Borde Hill Lane Haywards Heath

Sir,

The latest changes made to this planning application are insignificant and will not reduce the negative impact this development will have on the town.

A smaller roundabout will not reduce the volume and speed of traffic on Borde Hill Lane, Hanlye Lane, or the Balcombe Road—nor will it decrease the number of people who think it is acceptable to use a mobile phone while driving up and down the Balcombe Road at speed. Furthermore, a very minor reduction in the number of houses proposed will have an insignificant impact on the damage caused by this development in the first place.

As we are now about to enter our third heatwave of the year, the Council cannot ignore the negative impact this development, along with the thousands of other houses built recently, will have on infrastructure. South East Water talks about plans to increase capacity, but nothing yet has been agreed, and if any such agreement is reached, construction could take decades. When Ardingly reservoir was constructed, it was stated that it would meet household water supply requirements until the year 2000!

As stated in my husband's earlier objection, this development provides no benefits to Haywards Heath and will only increase the pressure on already stretched resources—namely doctors, dentists, schools, roads, policing, parking, and the supply and removal of water. Therefore, this plan should be rejected.

Yours faithfully,
