Subject: Planning application no DM/26/1186

[REDACTED]
Good afternoon,

Further to my last email complaining about this planning application , I would like to add further comments.

- 1 The overall appearance of this quaint rural area would be completely destroyed by new builds
- 2 I can't get into your site to see the quality of the design
- 3 There would be a huge overbearing impact on congestion of traffic, specifically during events at the showground. It would make further demands on our water supply. There are not enough school places. The infrastructure is not in place to support a larger community- transport or shops.
- 4 The only economic benefits would be to the developer , or the people the developer pays on the council.
- 5 The roads are already very dangerous to animals, children and people . Heidelberg lorries come thundering up College Road onto selsfield Road . We do not want more traffic. It would also be very very congested on event days. It would be very tricky getting out of the estate on those days.
- 6 The value of the countryside and rural nature of the showground and village cannot be overstated. New houses would destroy the character of that completely
- 7 The noise those new houses would get when events are on would be horrendous. This noise already intruded into the peace of the whole village on event days and especially in the evening. I would feel very anxious indeed about babies and children sleeping near to these events.
