The current plans for this development show an access roundabout in Imberhorne Lane close to the rear of the gardens of nos. 2,4,6, and 8 Bluebell Close.

The plan shows that a large part of the grass verge in Imberhorne Lane, with the footpath virtually adjacent to the boundary walls and virtually no safety margin between the footpath and the roadway, which will be taking much higher volumes of traffic than at present.

The plan should move the roundabout a small distance to the west leaving the current verges intact, thereby increasing safety for pedestrians walking along Imberhorne Lane.

I hope, for safety considerations, that you will approve such a change to the plan.
