Dear Sir

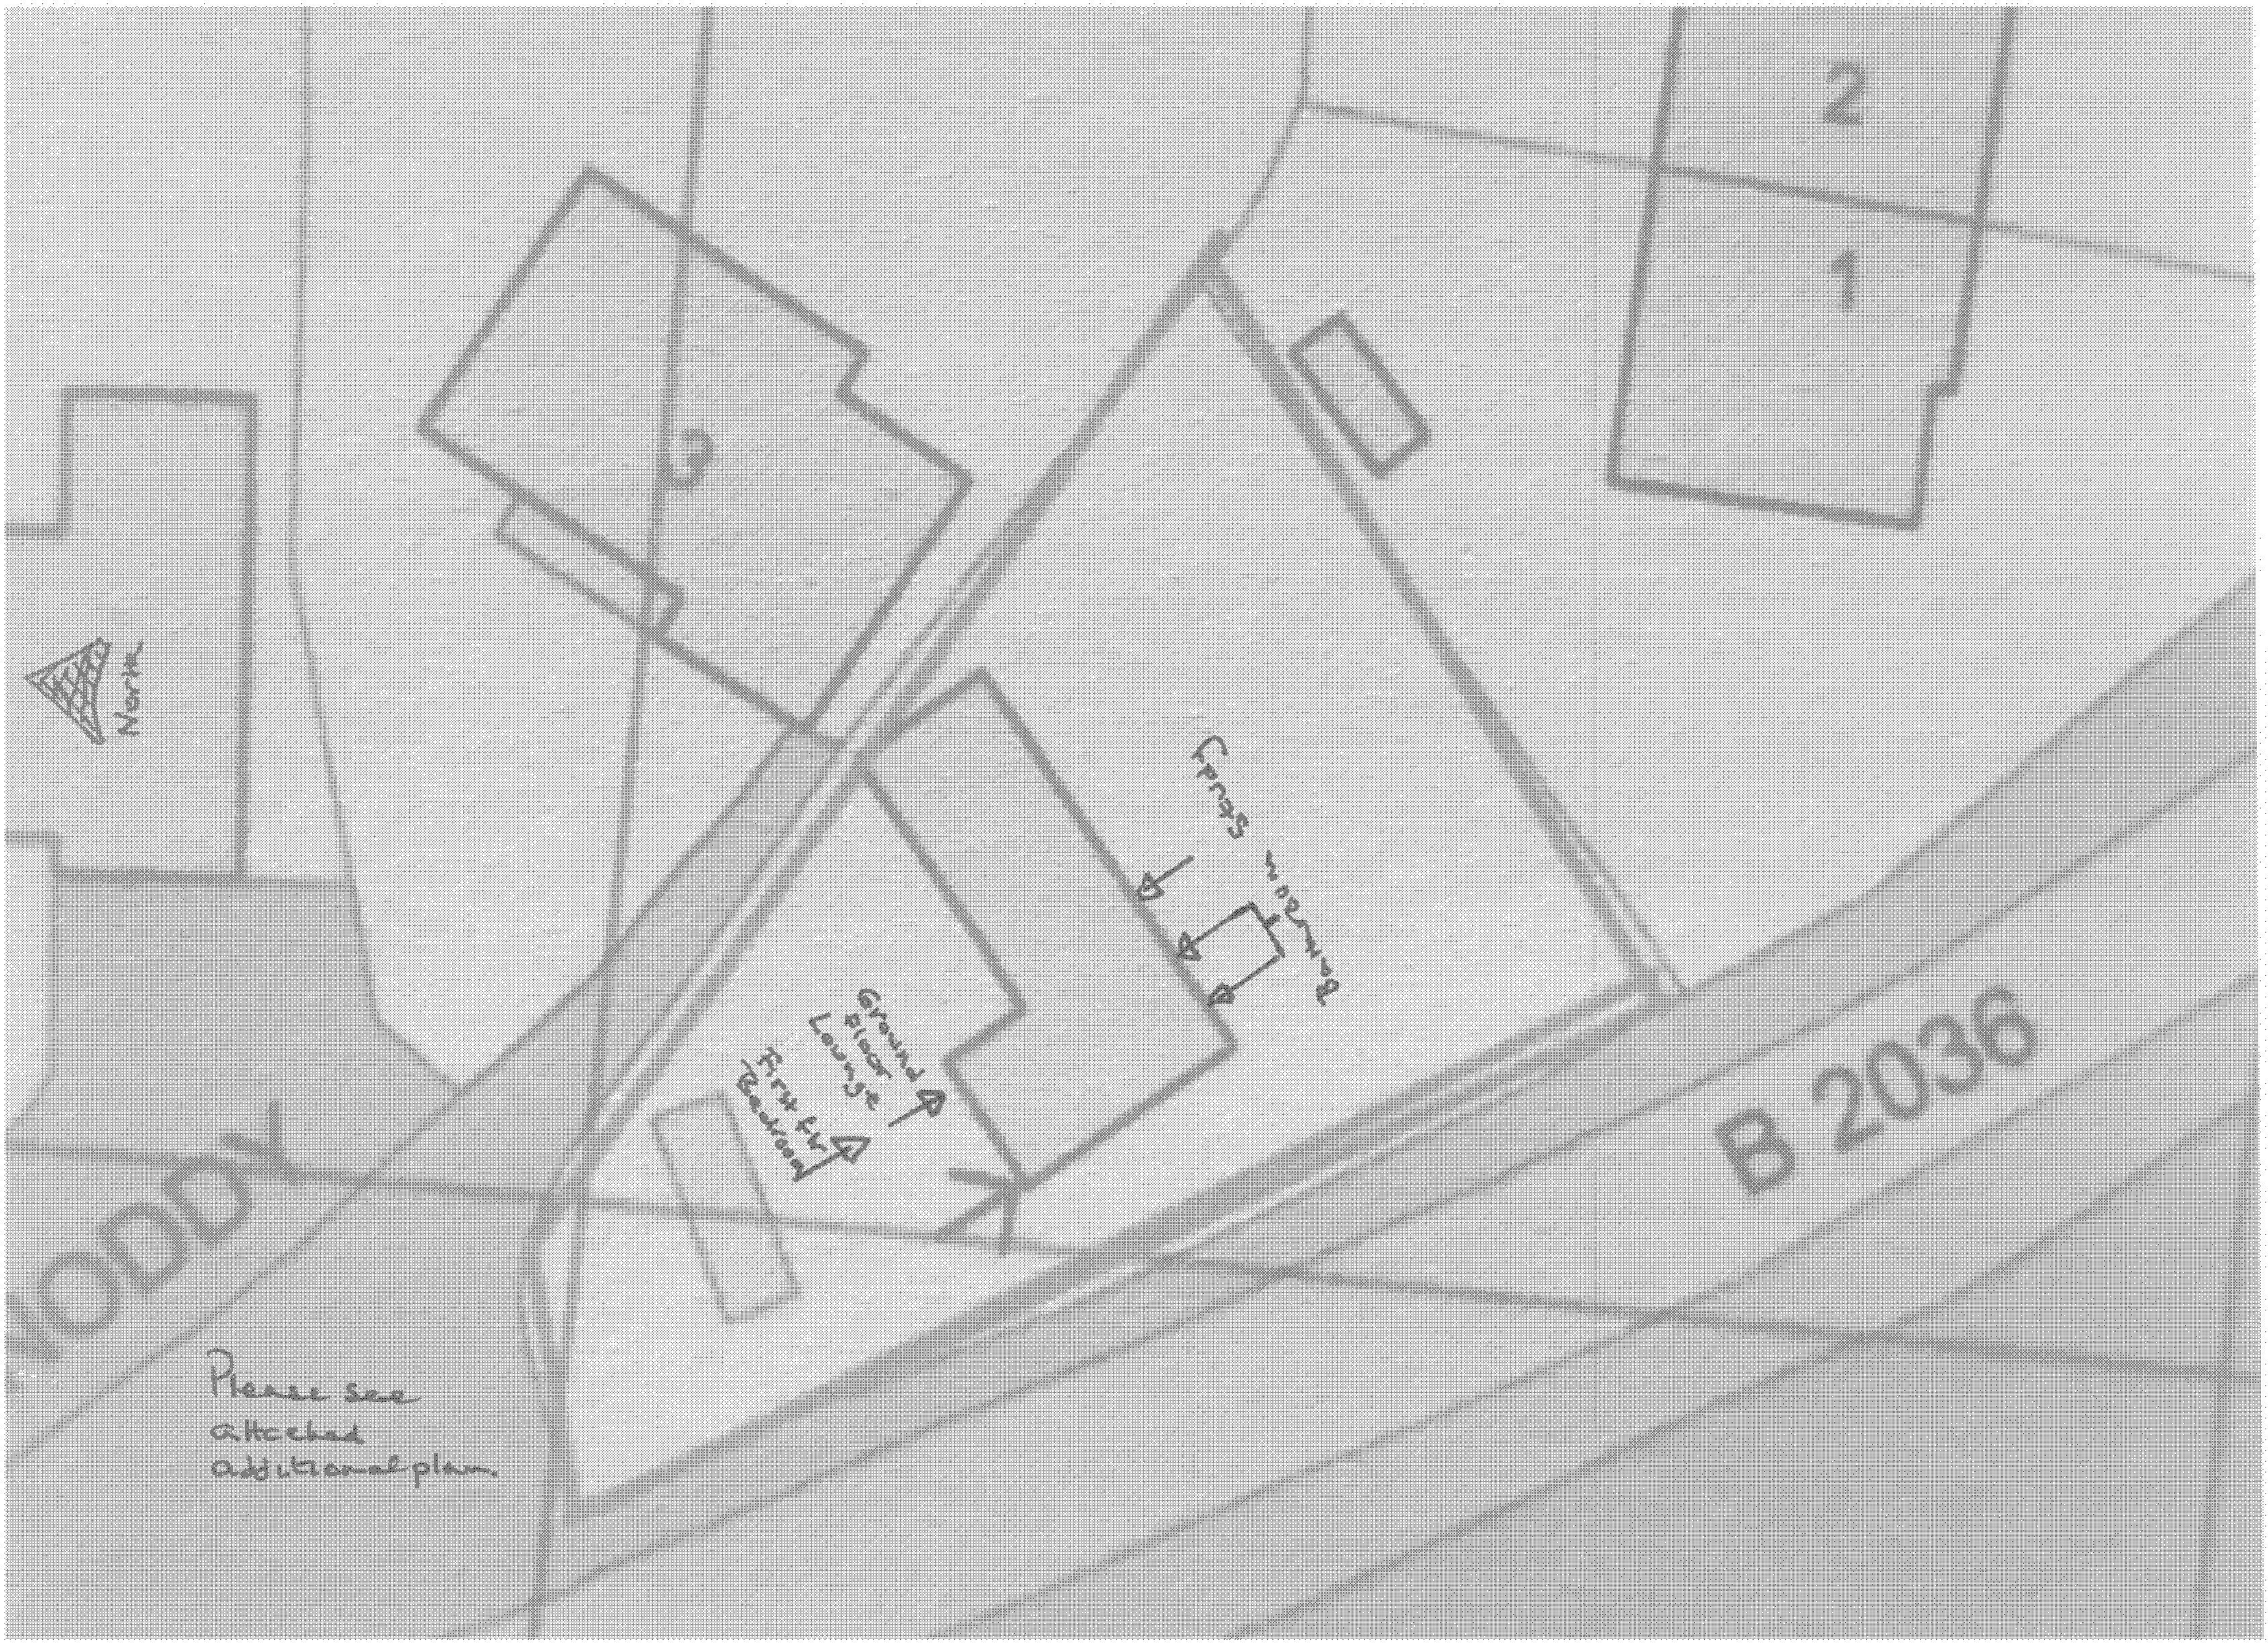

Re: DM/26/1966 Mount Noddy Cottage

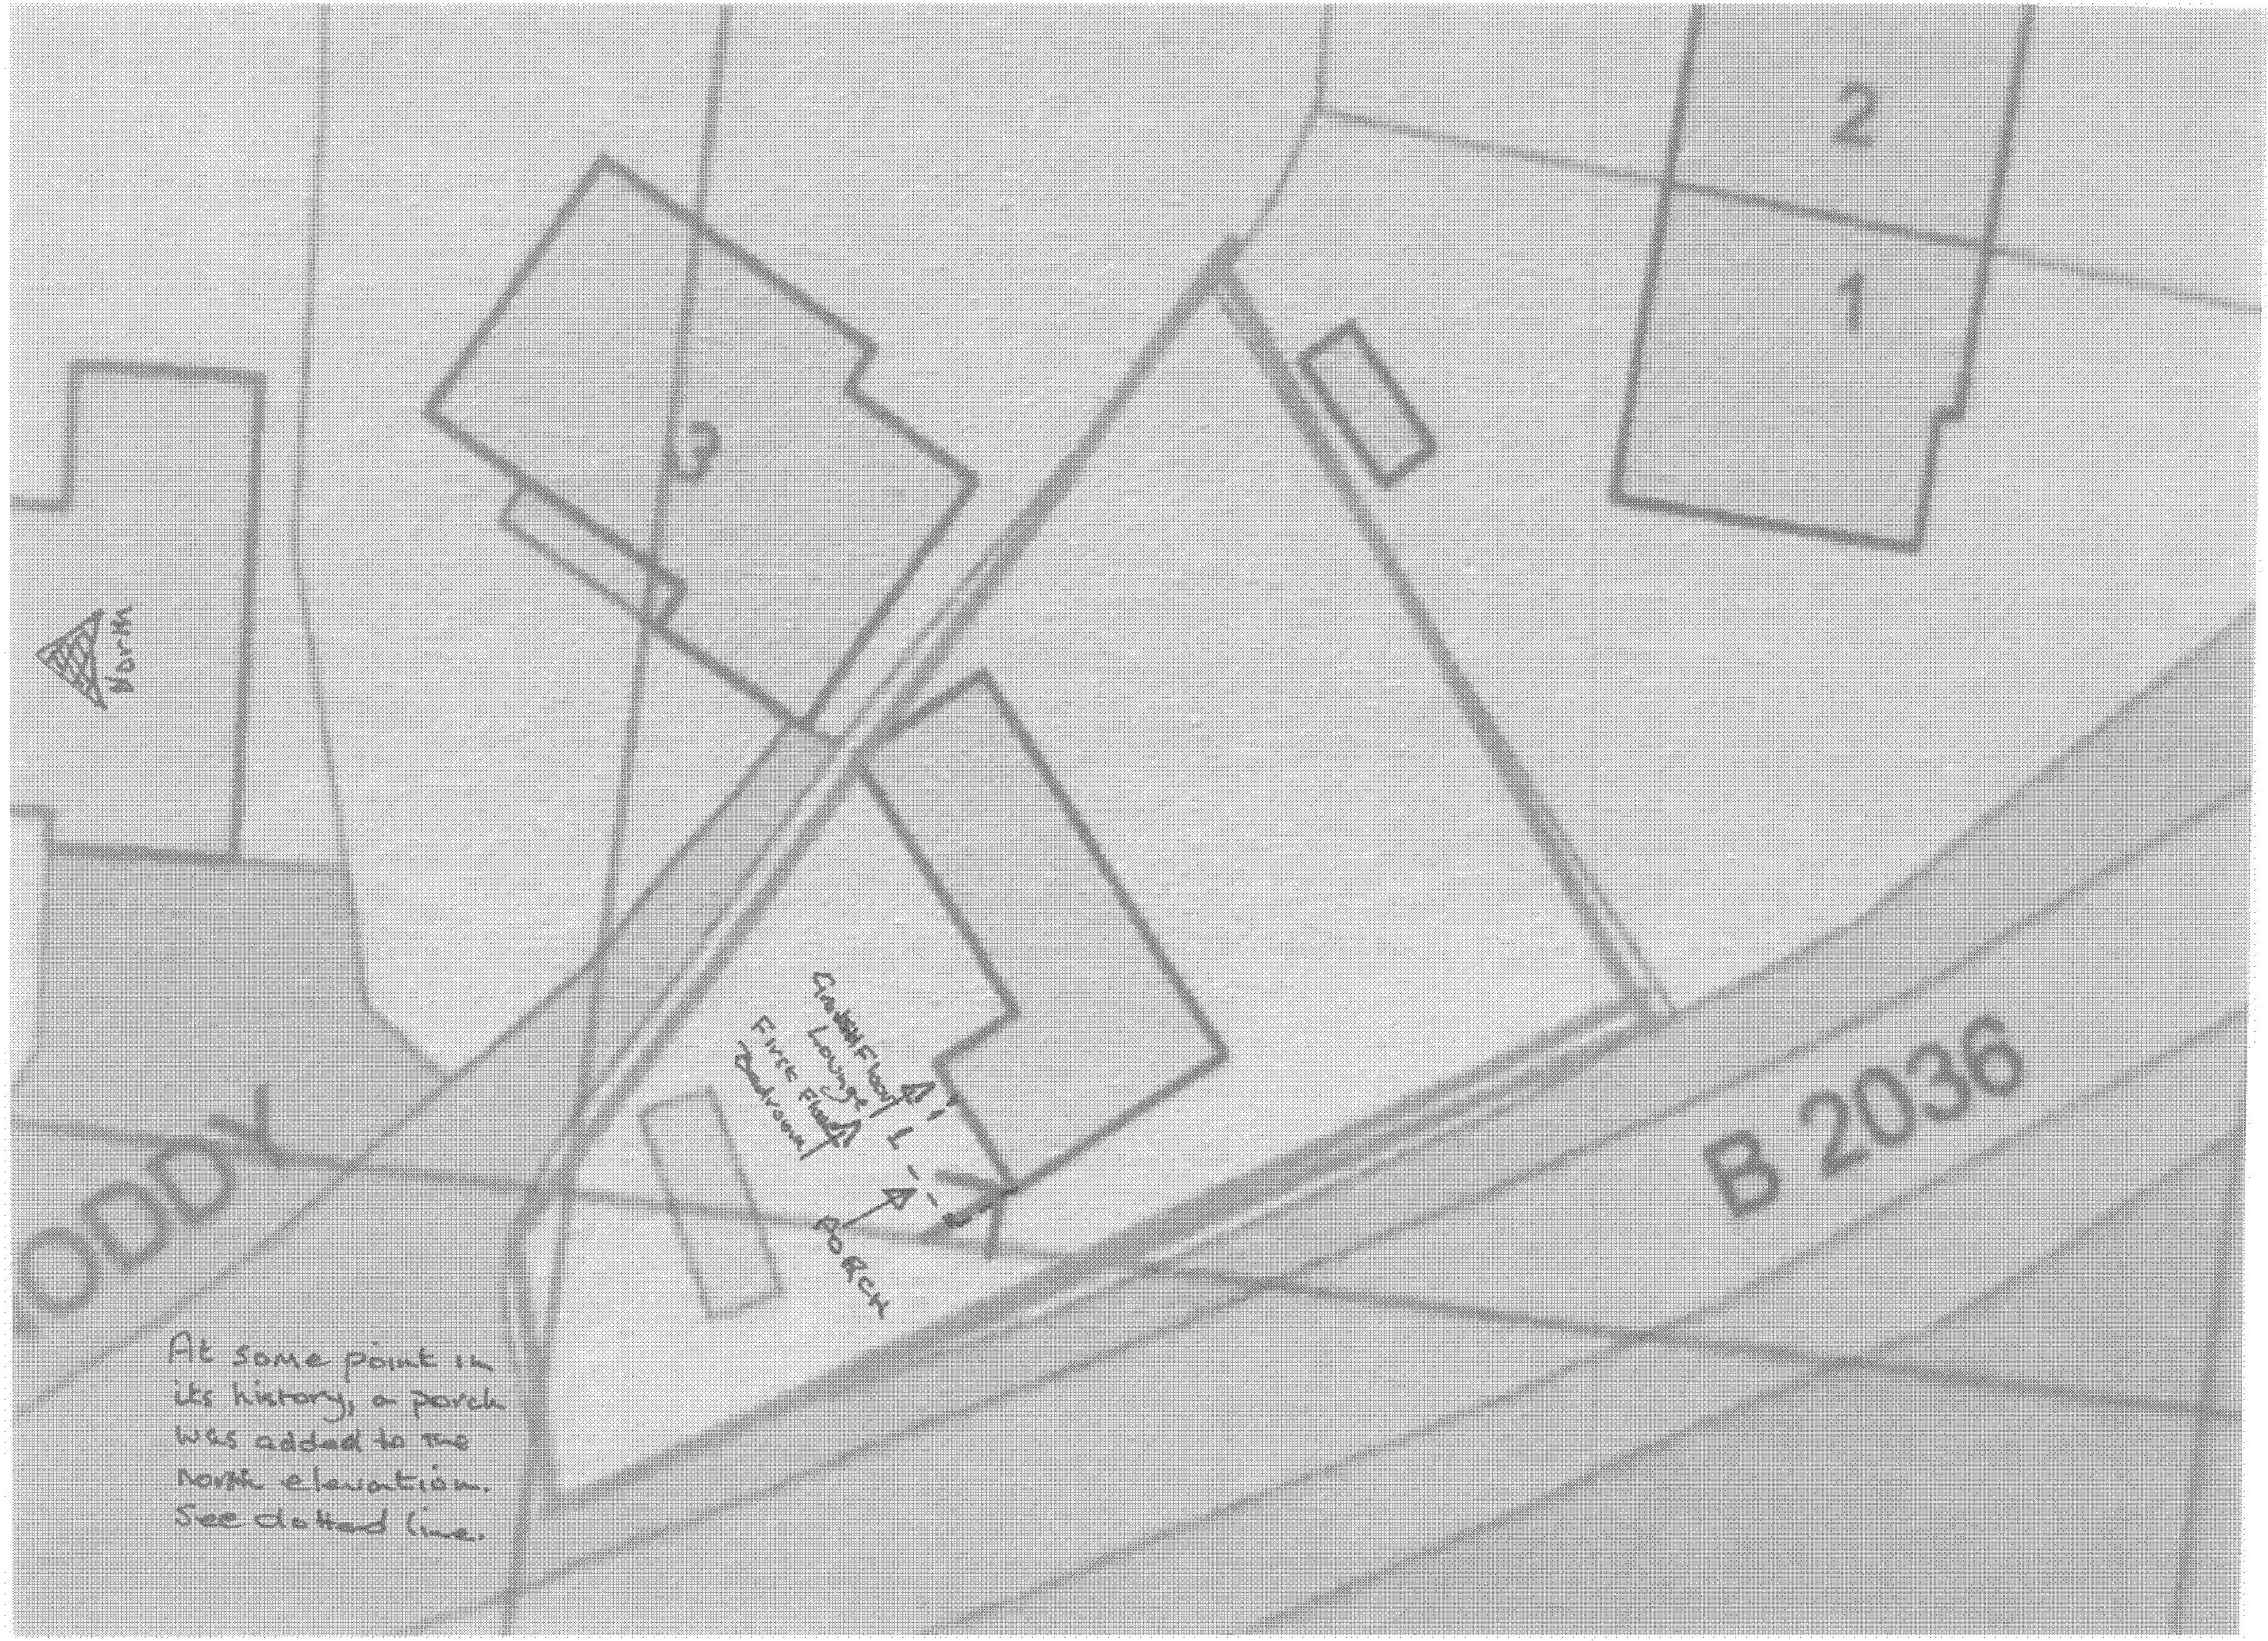

Thank you for your email. With regard to your request for additional information, we enclose the following:

1. Two copies of the Location plan. One shows the location of the three windows on the south elevation to be replaced, ie two bathroom windows and study window all on the ground floor. On the north elevation we have indicated the position of the two windows to be replaced, ie lounge window on ground floor and bedroom window on the first floor above the lounge window. However, we have included a second plan which indicates the porch, which is not shown on the Ordnance Survey plan, and the location of the two windows to be replaced in relation to this porch.
2. Photograph of the south elevation in its entirety showing the three windows to be replaced, ie two bathroom windows and the study window.
3. Photograph of the north elevation. We have a problem photographing this elevation in its entirety as we cannot get back far enough, and if we try to photograph it from the drive, due to it being lower than the cottage the hedge hides most of this elevation. So we have done what we can and it shows part of the porch, all of the first floor bedroom window to be replaced and part of the ground floor lounge window below the first floor window. No other windows on this elevation are to be replaced.

We trust the information enclosed will be sufficient for our application to be progressed.
