Subject: 2026.07.16 Re: DM/25/0709 - Plummerden House Park Lane Lindfield Haywards Heath West Sussex RH16 2QS

Dear Caroline,

Thank you for re-consulting the Flood Risk and Drainage Team on the above application.

We have reviewed the submitted Flood Risk Assessment and Drainage Strategy (Revision C, June 2026), together with the additional information relating to the proposed deep bore soakaway testing and revised Surface water drainage strategy.

The submitted information satisfactorily addresses the outstanding matter raised in our consultation response dated 11.05.2026.

This is acceptable in principle, subject to detailed design.

Information into our general requirements for detailed surface and foul water drainage design is included within our 'DETAILED DRAINAGE DESIGN CHECKLIST'
<https://www.midsussex.gov.uk/media/yyxere1u/msdc002-detailed-drainage-design-checklist-v20-issued-071125.pdf>. This level of information will be required to address the recommended drainage condition.

Based on the information available, the Flood Risk and Drainage Team has **no objection** to the proposed development on flood risk and drainage grounds, subject to the following condition.

This is acceptable in principle, subject to detailed design.

Condition Recommendation

C18D

The development hereby permitted shall not commence unless and until details of the proposed foul and surface water drainage and means of disposal have been submitted to and approved in writing by the local planning authority. The **building** shall not be occupied or brought into use, until all the approved drainage works have been carried out in accordance with the agreed details.

Reason: To ensure that the proposal is satisfactorily drained and to accord with Policy DP41 of the Mid Sussex District Plan 2014 - 2031 and Policy ...'z'... of the Neighbourhood Plan.

Best Wishes

Flood Risk and Drainage Team
Estate Services and Building Control
