Sorry Debbie,

My email last week had the wrong DM ref on it. The email referred to DM/26/0167.

Im sending the comments again:

My only recommendations with the above would be to regulate demolition/construction times, times for deliveries during the demolition/construction phases and a CEMP to control dust.

Are they going to put in any plant do you know i.e. air conditioning or ASHPs. If so, that might require a condition to control noise.

Please let me know.

Thanks, and sorry for the confusion.

Kind regards,

Jane Cooper
