Good evening
To whom it may concern

Hi im emailing you as I been told that your the right person to contact . I live in rocky Drive and I am absolutely mortified about the proposal of a 22.5 meter telecom mast directly behind my property . Myself and my wife brought our property a few years ago because we love living in the countryside . Now to learn that there is a proposal for a mast directly behind well 40 /50 meters away from our family home my wife has a insulin pump that keeps her alive and if this mast was to really go ahead it could potentially interfere with her pump and that's not good . I will attach photos of the view from my back garden to where I think that this mast is intended . Not only will it spoil the view but all the wildlife around the area would be affected by this only in the last few weeks have i got photos of i think great crested newts in our garden which are endangered species and have also seen them by the boundary towards the area of the Mainline railway let's hope that they are not affected by this monstrosity . I hear that there would be 12 times contains around the bottom of this making it a big site and noisy. Let's hope that you when you consider this that you take all of the above in to consideration as im really sure that you would not really like to see this mast directly behind your property . I really do hope that someone will read my email and then I would like to have a reply back from you if you can yes I know that your busy with other things but this really means a great deal to me as it's only for the London to Brighton Mainline for around maybe 30 seconds . Surely there is a another way around this it's such a beautiful area would be a shame to spoil it .

Yours sincerely

Mr Shaun Venn
