Subject: Sugworth Farm Planning Application

[REDACTED]

[REDACTED] am writing to object to the above planning application to build 127 houses on this area of natural beauty in Haywards Heath. I use this road regularly to visit Borde Hill , Cuckfield and further afield and cannot imagine how congested it will be with all the extra cars , deliveries etc that will be needed to service so many homes.

The local area cannot possibly support so many houses in an area with no opportunity to walk anywhere useful so the impact on the transport / road network will be devastating . The environmental aspect is not limited to car but also the wildlife that will be displaced, the flora and fauna that will be ruined and the flooding potential for the whole area can not be underestimated. As an area we have demonstrated this year that the council cannot manage the problems that such a wet climate produces - potholes, floods, drainage to name a few.

The town is at saturation point in terms of infrastructure, health services , education , community spaces are all over subscribed and poorly maintained and the town itself is dying a slow death as retailers leave the area .

Presumably some of this is why the council only thought of 60 houses and are now considering a foolish doubling of that number. Even 60 is too many.

Please do not allow this to proceed .
