Good afternoon Stefan,

Having received notification of the proposed single storey ground floor rear extension at 8 Chancellors Park, we would like to highlight some inconsistencies between the application responses and what is happening at the property.

In the application it says that works have not started without consent however we would suggest works have started on clearance/foundations given the amount of activity over the last couple of weeks and into this one.

The application also states that hedges or trees would not be removed or pruned. We would again suggest this answer is inaccurate.

See attached pictures of our adjoining hedge before the original submission and work starting, and second photo showing a large chunk now removed as well as progress of the work that according to the application hasn't started.
