

There are no proposed changes at roof level to the main house.

The existing tile cladding to the side elevation at first floor level is to be replaced with a treated timber cladding in a horizontal orientation.

A tiled roof finish is proposed to the open porch structure to match the existing house.

At ground floor level, an open porch structure is proposed to the front elevation. The structure will comprise a low level brickwork pier, with exposed and treated timber frame structure.

The existing external opening [as denoted by the red dashed line] is to be infilled with brickwork to match the existing condition. Brickwork, brickbond, pointing and mortar are to match the existing condition.

A double glazed metal framed casement window is proposed to the side elevation within the original structural opening.
