Address: 30a Shepherds Walk hassocks

Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I strongly object to this application as it serves no benefit for our local community. 5G brings with it negative environmental and societal damage: Each 5G mast requires vast amounts of electrical energy to

operate. It is reported that greenhouse gas emissions from 5G alone could contribute to 23% of global greenhouse gas emissions by 2030.

The British Ecological Society cites RFR as a top emerging issue affecting natural diversity and has seriously harmful effects on wildlife, particularly on bees.

Wireless radiation is recognised as an environmental pollutant.

This list of negatives associated with 5G is almost limitless, but ultimately, the planet DOES NOT NEED IT.

MSDC Planning Department have already destroyed the village nature of HAssocks with their despicable acceptance of the destruction of green space to allow unsustainable development, and this department will be held accountable by future generations. Do something beneficial for a change, otherwise hang your collective heads in shame.... again.

Kind regards
