Dear Steve,

Please see attached from the padel installation company re Condition 7.

I trust this is sufficient but if there are any queries please do let me know.

Kind Regards

Phil Herbert

Condition 7 - Padel lighting scheme affecting residences in the immediate locality

The padel court lights are now complete and the lights installed. The wind / rain screens are fixed around the perimeter from eaves level down to a height of 3m above the floor level. These screens will shield the padel lights and substantially reduce Lux levels outside the canopy. Please see attached photographs.

In addition, there is also a wooden acoustic barrier on the side of the courts that faces the residences.

Because of the low power of the LED lights, the wind / rain screens and the acoustic barrier I do not believe that there will be any light spill or glare from the padel courts.

Kind Regards

Gordon
