

Dear Catherine,

Thanks for talking to me on Monday about my concerns for the proposed extensions to 4 Burston Gardens , East Grinstead.

This house has always been a source of contention ever since being built and I have raised my concerns then and now with this new application.

Here is a List of those concerns

1. I'm concerned that the Gable end first floor rear extension will be overbearing, especially with a full length window and a juliette balcony,
2. Increased loss of privacy.
3. We have suffered from flooding since this house was built, even though we were advised that a pump would be installed to alleviate any excess water. This extension would in my opinion just exacerbate the situation.
4. In addition the house already has 2 Velux windows in the rear roof and we wouldn't want more as these overlook us.
5. As a result of our lack of privacy we have had to increase the height of our boundary hedge and this makes us feel closed in. This hedge is expensive to maintain, as we are no longer able to cut it as we are both getting older and for health reasons are not able to use a ladder.
6. With the proposed alterations to the garage roof and fenestrations I hope this also won't further intrude on our privacy.

We look forward to your visit in early June to discuss our concerns and fully explain exactly what is being proposed as the plans are difficult to understand.

Attached are the views from our garden to 4 Burston Gardens.

kind regards
