

Objection on the Proposed Building Works

Good Afternoon Catherine,

Following the conversation yesterday regarding the above application of:

4 Burston Gardens, East Grinstead, West Sussex, RH19 2HD

We are the residents of No 3 Burston Gardens and have lived at this address for 32 years.

Planning was submitted in August 2006 (Ref GR/06/01671/FUL) for No 4 to be originally built.

When the build started on the Garage it was observed that the height was over the dimensions of the planned drawings, so a representative from Mid Sussex Council came to look at the Garage and it was decided that it had to be rebuilt to the correct plans as agreed, it was very overpowering to our property.

To which we would like to raise our following concerns which we have regarding the present application.

The property at present has a significant overbearing impact on our outlook from our rear garden.

Proposed New Plan

With the proposed new plans for the Garage Alterations, this will once again increase the significant overbearing impact and loss of outlook on our property, also the environment which this will have on the appearance of the area in which we live.

There will also be increased noise and disturbance as the Garage and Drive is next to our Garden, which does have an impact on our Health & Wellbeing.

We have also attached photo's for your perusal from our rear Garden.

We therefore wish for the above concerns to be considered as an objection for this application.

Yours sincerely,

[REDACTED]
