Subject: Formal Objection - Planning Ref: DM/25/1495.

[REDACTED]
Formal Objection to Proposed 25m 5G Mast – The Beeches, Rocky Lane, Haywards Heath (RH16 4XD)
Planning Ref: DM/25/1495.

Dear Sir/Madam,

I am writing to strongly object to the proposed erection of a 25-metre 5G mast near our housing estate, The Beeches, off Rocky Lane.

1. Completely Inappropriate Height and Location

A 25m industrial mast is totally out of scale with this residential area and would cause severe visual intrusion. Placing infrastructure of this magnitude directly beside homes is unacceptable when less sensitive sites clearly exist.

2. ICNIRP Safety Guidelines Do Not Cover People With Metallic Implants

I have three metallic implants in my right ankle. The ICNIRP guidelines cited by the developer clearly state that metallic implants may alter or perturb electromagnetic fields in the body, which in turn may affect the body.

This means people like me are not covered under the standard assumptions used in the ICNIRP compliance declaration. The applicant has offered no assessment of how the mast's emissions may affect residents with implants—despite acknowledging this recognised category of risk.

3. No Demonstrated Need for This Site

The applicant has not justified why this height or this exact location is necessary, nor shown that alternative non-residential sites were properly considered.

For these reasons, I urge the council to reject this application in full. This mast is unsafe, unjustified, and entirely unsuitable for a residential environment.

Yours faithfully,
