Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer made comments neither objecting to or supporting the Planning Application
Reasons for comment:	
Comments:	Initial observations: The design and Access Statement says, "The palette of materials that have been selected will match existing ones found on site. See planning drawings for more information". How is this the case when the cladding is black and the original brick has been rendered? The cladding is not timber, it appears to be composite. The cladding is black and the front door is orange, this is not

described in the plans.

The render is white/ off white, but the colour is not described in the plans.

The drainpipe on the East elevation is not shown on the plans.

The relocated boiler flue is not marked on any of the plans.

The configuration of the windows on the south elevation plan do not match the as-built photos.

The proposed South elevation does not appear to have been accurately drawn. It is not the same height as the roof shown on the proposed East and proposed West elevations. The as-built photo has a larger expanse of cladding above the first floor window.

The proposed East elevation shows cladding only on the proposed scheme. It in fact wraps around part of the original dwelling to form a large black rectangle on the east side.

Kind regards
