Planning Application No.
DM/26/0303

30th July 2026

Dear Mr. King,

I have already sent on the 17th March a letter of objection to the above Planning Application both to Tisbury District Council and to Mid Sussex District Council.

I reiterate most strongly my Objection.

The Meadows support a huge variety of wildlife, most of which are protected species. Wildlife is being squeezed more and more out of their habitat, especially around our village of Copthorne with the relentless housing developments.

It is worth noting that none of this housing is ever available for local people.

Copthorne is rapidly losing the village atmosphere with so much development.

Borers Arms Road is already constantly busy and much more so during peak hours. To expect that extra amount of traffic from this proposed development to be able to come out onto and join Borers Arms Road would be ludicrous.

Local schools and the GP surgery are already full to capacity.

Where would all the water go from such a development when the heavy and prolonged rain comes again, as earlier in the year and previous spells? Although we live on an incline, the ground becomes a bog and only the surface dries on a fine day.

PLEASE DO NOT APPROVE THIS APPLICATION. There is no benefit locally in destroying these Meadows.

Yours faithfully,

TO: Steven King
Cllr Officer
Mid Sussex District Council
