Hi Zac,

Thank you for your email and my apologies for the delay.

I have been away for a few weeks due to a family bereavement and have only just returned to work, and therefore a decision has been unable to be made on this application within the previously agreed extension of time.

Can I request a final extension of time to 10th April.

Kind Regards

Hi Zac,

Thank you for your email and my apologies in the delay to my response. Please see the attached latest comments from the Flood Risk and Drainage Team who raises no objection.

Following this I would like to request the following pre-commencement conditions, please confirm if these are acceptable.

- The development hereby permitted shall not commence unless and until details of the proposed foul and surface water drainage and means of disposal have been submitted to and approved in writing by the local planning authority. The building shall not be occupied or brought into use, until all the approved drainage works have been carried out in accordance with the agreed details.

Reason: To ensure that the proposal is satisfactorily drained and to accord with Policy DP41 of the Mid Sussex District Plan 2014 - 2031.

- No development shall be carried out unless and until details of materials and finishes to be used for external facing walls and roofing have been submitted to and approved by the Local Planning Authority. The works shall then be carried out in accordance with the approved details.

Reason: To protect the appearance of the building and the area and to accord with Policies DP16 and DP26 of the Mid Sussex District Plan.

Kind Regards

Subject: RE: Until - Stanbridge Industrial Park, Staplefield Lane, Staplefield

Hi Katherine,

I hope all is well.

Please find attached the updated SW Management Report and drainage layout drawing (as Appendix H).

We have revised the drainage survey information with the most suitable option for the foul water is to discharge through a new treatment plant and to the existing outfall pipe to the watercourse (as surface water run-off). The reason for this is that the Environment Agency requires the receiving watercourse to have flowing water and not a ditch that could be dry for long periods of time. Also, it is a definite design solution in terms of discharge rather than negotiating the repairs to existing pipes to ensure flooding doesn't occur from the existing network to the north.

As the treatment system is within the site boundary, and both the surface and foul are shown to discharge to an existing surveyed outfall pipe to a watercourse, this should meet the LPA requirements.

These documents comply with all consultee requirements, and we therein look forward to receipt of a decision. We would be open to discussing an Extension of Time to allow for this.

I look forward to hearing from you on this.

Hi Katherine,

Thank you for the update and for continuing to chase this.

Does the Council intend to wait for an updated consultation response to issue the decision? Is there a deadline which could be put into place perhaps?

I am just thinking an argument could be made to suggest that due to the nine month timescale/delay, providing a response is clearly not a priority for them.

I look forward to hearing from you.

Dear Katherine,

I hope all is well.

I apologise for chasing again, but please may I ask if you are able to provide any update on this matter?

Our client is getting quite frustrated, so even if you are able to provide an updated timescale that would be appreciated.

I look forward to hearing from you.

Kind regards,

Zac

Dear Zac,

Thank you for your email.

Unfortunately I have not yet received a response from the Flood Risk and Drainage Team on the latest information. I have escalated this to my manager due to the continued delay in comments.

My apologies for the continued delay in the determination of this application.

Hi Katherine,

I hope all is well.

Please find attached the revised SW Management Report.

Details of our response are already in the report, with key points being highlighted (notably Sections 3.6 and 5). The drainage layout (Appendix H) however, has been updated to show similar text to that in the report. Hopefully, this clarifies the strategy.

I look forward to hearing from you.

Subject: RE: DM/24/1585 - Stanbridge Industrial Park, Staplefield Lane, Staplefield

Hi Katherine,

Thank you for the email.

I have discussed this with our Drainage Consultant and our response to the flood risk team is as follows:

Surface Water

We can confirm that all drainage features are within the development boundary. The red line shown on the drawing is the surface water management boundary only. Therefore, is a boundary showing the extent of surface water run-off being managed and not the development.

As detailed in our report, the surface water run-off from the existing barn with the site currently discharges onto ground (no existing networks). The surface water from the barn then flows across the adjacent field and into the watercourse approximately 350m to the north.

The proposed drainage strategy is to restrict the surface water to a natural / greenfield rate prior to discharge to an outfall trench along the northern boundary of the site. Surface water from the outfall trench will disperse across the a large part of the site boundary, across the adjacent field and into the watercourse approximately 350m to the north.

Therefore, the development, in terms of flood risk, will have no impact on the neighbouring land. The surface flows are at a natural rate and flow in the same direction to the same destination as in a pre-development state.

This method of discharge has been used on many developments, with other local authorities accepting the principles. Therefore this should be the case for this development.

Foul Water

We can confirm that the waste treatment plant is within the development boundary. The red line shown on the drawing is the surface water management boundary only.

Foul water from the treatment plant to discharge of the Southern Water network as shown in Appendix E of the report.

I look forward to hearing from you on this.

Kind regards,

Zac

Dear Zac,

Thank you for your email.

The consultee responses received at present raise no objection, however I have noted that the Flood Risk and Drainage Team have been missed from being consultation.

They have now been consulted however the statutory 21 days consultation period extend beyond the target date of the application. Due to this I would like to request an extension of time to 26th February, please confirm if this is acceptable?

At present I have no concerns regarding the proposal and do not require any further information.

My apologies for the delay this will cause in the determination of the application.

Subject: DM/24/1585 - Stanbridge Industrial Park, Staplefield Lane, Staplefield

Dear Simon,

I am writing with regards to the above application.

The application form states that in terms of BNG the proposal would be de minimus as would impact less than 25sqm of habitat and therefore exempt. However, the proposed parking area would be positioned on an existing grassed area with a floor area of approximately 180sqm, which exceeds the threshold.

The application is therefore considered to require BNG and will be made invalid until this information has been provided.

I hope that this clarifies the planning position.

Many Thanks
