[REDACTED]

I write to object to planning application DM/26/3017 Glebelands Field Bolney.

My objections are as follows

The roads around this proposed development are lanes not suitable for increased traffic and include a dangerous blind S bend.

Glebelands Field is within a rural landscape with a footpath and has a wide variety of wildlife. This development would result in reduced biodiversity and loss of habitat.

We currently have problems in the area with cuts in electricity and water services. This field often shows signs of surface water. Over housing will only put more strain on the current services.

The area has a lack of schools and our public transport is virtually non existent. We rely on our own transport to get to doctors hospitals schools etc. increasing traffic even more.

For the above reasons I ask that this application be REFUSED by MSDC
