Subject: Ref: DM/25/1349 - Objection

You don't often get email from [REDACTED] [why this is important](#)

Please note my objections below to the mast proposed by Cellnex Connectivity Solutions Ltd

- It is visually intrusive and out of character with the surrounding area's rural location.
- It will detract from the value of local homes.
- It will detract from the visual enjoyment of local homes.
- Noise pollution to local residents and wildlife will increase.
- Potential health risk to local residents and wildlife.
- No benefit locally, only to train users. As a commuter for 30 years I managed perfectly well without mobile network access throughout my daily journey to London.
- This is an area of outstanding natural beauty and part of the South Downs National Park which should not be impacted by intrusive masts.
- The mast is far too tall, being higher than the tree line.
- The building of the structure will increase traffic on local roads which are already under pressure from residential developers and additional new resident traffic.
- Possible light pollution if the mast is lit by night which will impact both local people and wildlife.
- Negative impact on wildlife as it will reduce local natural habitat.
- The area has ancient woodland nearby which must be protected.
