Subject: Planning Application DM/25/1185 Installation of a Padel Court adjacent to Southdowns Park.

[REDACTED]

Supplementary Comments.

Thank you for your notice of 11.11.25 high-lighting additional information relating to this Application. The new Noise and Lighting assessments only serve to confirm my original fears that installation of Totally Open Air Padel Courts on this site will be both detrimental, indeed potentially fatal in the longer term, to the adjacent Bowls Club unless any Approval also specifies provision of an Acoustic Fence [Absorbent Sound Screen] along the whole length of the joint boundary and to at least the full height of the existing tennis court fencing. This protection does not appear in illustrations or proposals within the current Application and I therefore maintain the objections made in my previous submissions of 4th and 10th. September 2025. The Proposers already have a published outline plan (June 2023) for Padel Courts within their Colwell Grounds 'Community Sports Complex' Project which offers a more appropriate location and should be progressed and the current Application withdrawn.

Kind regards,
