Land To The Rear Of 18-26 Railway Approach – Foul – Surface Water

Land To The Rear Of 18-26 Railway Approach

East Grinstead

West Sussex

RH19 1BP

PROPOSAL

The existing property has a connection into the main sewer system for waste water.

The proposed scheme will provide a single toilet and basin connected into the mains sewer.

The surface water will be stored and re-used in parts of the building and site irrigation with an attenuation tank storage and overflow in to the existing shared sewer.

The full detailed design and specification will be developed post planning approval.
