The Hedges

The Chestnuts

Quiteways

Beeches House

Woodpeckers

At present there is approximately 2m clearance to ground level at lowest point on the Northern section over grass area.

Works are for general upkeep and maintenance to the tree and to keep lower branches clear from roadside.

To reach the requested clearance of 4m, it would mostly be the removal of epicormic growth with minor pruning on lowest limbs.

The work would not be detrimental nor affect any amenity values to the tree or area.
