Dear Rachel,

Thank you for consulting the Flood Risk and Drainage Team on the above application.

We understand the proposed application is for the construction and operation of a micro energy storage facility and associated works.

The site lies within Flood Zone 1 and is therefore at very low risk of fluvial flooding. The Risk of Flooding from Surface Water mapping suggests the site is shown to be at very low surface water flood risk for the present day and with climate change.

We have no objection to the proposed development on flood risk grounds.

Drainage should be managed via Building Regulations and Building Control, as necessary.

Best Wishes

Flood Risk and Drainage Team
Estate Services and Building Control
