

Renewal and minor enlargement of existing extension to 66 Crescent Road, Burgess Hill, RH158EG

Following damage to the original extension and to ensure its future stability rather than repair, the extension will be replaced and in doing so improved in design and appearance. As a result:

The external dimensions of the extension would be slightly increased as follows:

- Width by 60 cm / 2 ft
- Height by 25cm /10 inches

The external design would also complement the main house – the bottom section likely being brick faced, similar to the original structure, with the upper section being rendered/pebble dashed and painted to match the rest of the house.

Separately, there will also be a paved front drive added with new adjacent fencing, which will enhance the overall kerb appearance of the property.
