Re. application No. DM/25/1328

I wish to strongly object to this proposal.

Over the last several years 4 wheel drive events have been held at this site for between 10 and 15 times a year.

Although this is an A.O.N.B we've had to put up with noise and fume pollution from this site to such an extent that it's impossible to enjoy the garden when events are on. I have frequently complained about the goings on to both the police and the parish council.

After the events there's often a trail of mud and debris all along Colwood Lane which is rarely cleaned up until a day or two later – if at all. The situation was so bad on 2 occasions that I was forced to report it to W.S.C.C. who came and cleaned the road. Although many vehicles are taken to this site on trailers (which in itself often causes problems on what is little more than a single track road) many more are driven to and from the site. Since these vehicles have been adapted for off road use they are often in a legally unroadworthy state and are uninsured.

To my knowledge there has been at least one successful prosecution for uninsured driving to these events.

There have also been regular visits to the site by tipper lorries dumping rubble and other waste materials which cause me worries about potential pollution. Again I must state that this is an A.O.N.B. so should this be going on?
