

Please find attached a statement and supporting photograph in relation to point 3 of your email.

3. As the proposal involves works within a defined Archaeological Notification Area please supply a Heritage Statement for the application. This should describe any heritage assets that are affected, including any contribution made by their setting, and the potential impact of the proposal on their significance.

I am unaware of any heritage assets that would be affected as a result of building a small wooden shed in our back garden. This 3 year old housing development (built by Bellway) was previously a golf course. We have contacted Bellway and they have confirmed they are happy for us to build a shed in our back garden. I have attached a photograph showing all of our neighbour's back gardens. There is already 1 x large shed, 3 x small sheds and 1 x green house. If I remember correctly, Bellway built the 3 x small sheds at the same time as they built the houses. One the right edge of the photograph you can see a section of a larger shed with power that is used as a daily office with desk and computer.
