Re DM/25/0743

Ref: LB/70/0045 -- Grade: II

Rosemary Cottage

High Street

Lindfield

The proposed works comprise of a small (3m long/2m wide/ 2.7m high) Victorian-styled enamelled metal framed greenhouse on a brick base.

The greenhouse is positioned approximately 30 metres from the main residence and 10 metres from an established summerhouse already on the grounds of the property. The greenhouse is approximately 19 metres from the rear entrance to the property.

The construction of the greenhouse involves no demolition of any existing assets and does not involve any groundworks.

The greenhouse provides additional warm growing space for the substantial garden and adds architectural interest to the lower end of the plot.

The style also mirrors that of the greenhouse of the neighbouring plot.
