

Site NE of No1 park Parade showing access road. The site was created when the garages collapsed and the retaining wall was replaced. Bins and recycling area cab be seen in the middle of the line of garages. The Zizzi restaurant is seen at the far end of the access road with the newly constructed flats beyond. The footpath is not associated with the site and a fence demarks the boundary of the site. Beyond the foliage on the other side of the footpath is the church yard.
