

Operational Management Note – External Display Shelf

The proposed external display shelf will be used solely for the display of goods associated with the retail use of the premises.

All sales transactions will take place within the shop premises. No payment, service, or transaction will be conducted on the public highway.

The external display will not operate as a separate trading point and will remain ancillary to the primary retail use within the unit.

The display will be positioned to maintain clear and unobstructed pedestrian access at all times, in accordance with the submitted drawings. The display will be installed only during opening hours and removed from the pavement after closing each day.

This approach ensures that the proposal does not constitute street trading and will not give rise to obstruction or amenity concerns.

Supporting photographs of the site and surrounding context are included below.
