Subject: DM/26/0771 - Hambrook School, Marle Place, 171 Leylands Road, Burgess Hill

Dear Stefan,

I have reviewed the Arboricultural Method Statement and Tree Protection Plan for this proposal and whilst I do not object, I still need further information.

The Tree Protection Plan shows where the fencing will be installed to protect the trees, but not the location of the equipment to be installed. Could the positioning of the equipment be added to the TPP?

Further, I noted that the report describes what will be done should roots over 50mm be encountered but not what will be done for those less than 50mm. Please could some details be added about the methods should those smaller roots be found?

Please reconsult me once you have further information.

Kind regards

Emma
