

WORTH PARISH COUNCIL

Acting Clerk:
Mrs Hannah Smith

Delivered by hand

28th October 2024

Dear Owner/Occupier

We have recently undertaken a survey of all trees under the responsibility of Worth Parish Council to identify any issues. Our surveyor has identified that the tree at the entrance to The Lindens is defective and has noted the following issues:

- Extensive crown dieback and significant deadwood
- Large ganoderma brackets at base
- Previous limb failure evident

The tree in question is a lime and has a What3Words location as 'dust.resort.city'. The reason this tree was identified is because it is within falling distance of land that the Council manages.

I appreciate that land at The Lindens is privately maintained and is potentially either under the control of a management company, or the collective management of the homeowners. Please can you either report this tree to relevant party, or instruct work to rectify it?

I'd be grateful if you would please update us when work has taken place.

Please feel free to get in touch with any questions.

Yours sincerely
