Subject: DM/25/3129 Sugworth farm development proposal

[REDACTED]

Dear Sir or Madam

I oppose this proposed development because I feel that Haywards Heath has far too many developments around it already turning it into a very large town. That coupled with the simply massive developments in Burgess Hill which practically link up with Haywards Heath already. Burgess Hill town centre looks in a very sorry state and I don't think the council has the money for an upgrade.

The rural character of Sussex is getting completely spoilt and this particular proposed development would greatly add to this. The traffic will increase tremendously adding to misery for all of us. Already the pot holes are getting out of control.

The trains will simply not be able to cope with the increase in use, especially if the second runway at Gatwick goes ahead. It is bad enough now, as I know, with journeys up to and down from London with the vast Gatwick and London traffic. At London Bridge in the rush hour it is often impossible to actually get on the train now let alone with an increase in the number of passengers.

Other very important services like GP practices will not be able to cope. Standards have dropped particularly for access. Already I know my neighbours were unable to get registered at a local GP practice. Parking, hospital care etc etc under huge pressure.

I just feel enough is enough- everywhere you go in Sussex it is build, build build!

Yours faithfully
