Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Mid Sussex District Council planning decisions with regard to potential ecological impacts from development. Any additional information, queries or comments on this advice that the applicant or other interested parties may have, must be directed to the Planning Officer who will seek further advice from us where appropriate and necessary.

Application: DM/25/1422
Location: Red House Cuckfield Road Staplefield Haywards Heath
Proposal: Loft conversion and two-storey and single-storey rear extensions to the existing detached house with a garden room extension to the existing garage; associated landscape and drainage alterations to incorporate a new outdoor pool.

Thank you for consulting Place Services on the above full application.

Summary

We have reviewed the Preliminary Ecological Appraisal (Ecology Partnership, August 2024) and the Bat Emergence Report (August 2024) relating to the likely impacts of development on designated sites, protected and Priority species & habitats and identification of appropriate mitigation measures and mandatory Biodiversity Net Gain.

We are satisfied that there is sufficient ecological information available to support determination of this application.

This provides certainty for the LPA of the likely impacts on designated sites, protected and Priority species & habitats and, with appropriate mitigation measures secured, the development can be made acceptable.

The mitigation measures identified in the Preliminary Ecological Appraisal (Ecology Partnership, August 2024) and the Bat Emergence Report (August 2024) should be secured by a condition of any consent and implemented in full. This is necessary to conserve and enhance protected and Priority species particularly those recorded in the locality.

As the Bat Emergence Report (August 2024) confirms the evidence of a single roosting bat, it is indicated that works will need a European Protected Species Mitigation Licence or will need to be registered by an individual with a Bat Mitigation Class Licence or Earned Recognition Class Licence. A copy of the licence or evidence that the site has been registered should be supplied to Council prior to commencement.

With regard to mandatory biodiversity net gains, it is highlighted that applications are required to deliver a mandatory 10% measurable biodiversity net gain, unless exempt under [paragraph 17 of Schedule 7A of the Town and Country Planning Act 1990](#) and the [Biodiversity Gain Requirements \(Exemptions\) Regulations 2024](#). As a result, we are satisfied that this application is exempt from mandatory biodiversity net gains, as the development meets the householder exemption.

We also support the proposed reasonable biodiversity enhancements for protected, Priority and threatened species, which have been recommended to secure net gains for biodiversity, as outlined under Paragraph 187d and 193d of the National Planning Policy Framework (December 2024). The reasonable biodiversity enhancement measures should be outlined within a separate Biodiversity Enhancement Strategy and should be secured by a condition of any consent.

This will enable LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended) and delivery of mandatory Biodiversity Net Gain.

Impacts will be minimised such that the proposal is acceptable, subject to the conditions below based on BS42020:2013. We recommend that submission for approval and implementation of the details below should be a condition of any planning consent.

Recommended conditions

1. ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS

“All mitigation measures and/or works shall be carried out in accordance with the details contained in the Preliminary Ecological Appraisal (Ecology Partnership, August 2024) and the Bat Emergence Report (August 2024) as already submitted with the planning application and agreed in principle with the local planning authority prior to determination.

This will include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details.”

Reason: To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

2. WITHIN THREE MONTHS OF CONSENT: BIODIVERSITY ENHANCEMENT STRATEGY

“Within three months of consent, a Biodiversity Enhancement Strategy for protected, Priority and threatened species, prepared by a suitably qualified ecologist in line with the recommendations of the Preliminary Ecological Appraisal (Ecology Partnership, August 2024) and the Bat Emergence Report (August 2024), shall be submitted to and approved in writing by the local planning authority.

The content of the Biodiversity Enhancement Strategy shall include the following:

- a) Purpose and conservation objectives for the proposed enhancement measures;*
- b) detailed designs or product descriptions to achieve stated objectives;*
- c) locations of proposed enhancement measures by appropriate maps and plans (where relevant);*
- d) persons responsible for implementing the enhancement measures; and*
- e) details of initial aftercare and long-term maintenance (where relevant).*

The works shall be implemented in accordance with the approved details shall be retained in that manner thereafter.”

Reason: To enhance protected, Priority and threatened species and allow the LPA to discharge its duties under paragraph 187d of NPPF 2024 and s40 of the NERC Act 2006 (as amended).

3. PRIOR TO COMMENCEMENT OF ANY WORKS WHICH WILL IMPACT THE BREEDING / RESTING PLACE OF BATS: SUBMISSION OF A COPY OF EPS MITIGATION LICENCE OR EVIDENCE OF SITE REGISTRATION UNDER A BAT MITIGATION OR EARNED RECOGNITION CLASS LICENCE FOR BATS

“Any works which will impact the breeding / resting place of bats, shall not in in any circumstances commence unless the local planning authority has been provided with either:

- a) a licence issued by Natural England pursuant to Regulation 55 of The Conservation of Habitats and Species Regulations 2017 (as amended) authorizing the specified activity/development to go ahead; or*
- b) evidence of site registration supplied by an individual registered to use a Bat Mitigation or Earned Recognition Class Licence; or*
- c) a statement in writing from the Natural England to the effect that it does not consider that the specified activity/development will require a licence.”*

Reason: To conserve protected species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s17 Crime & Disorder Act 1998.

Please do not hesitate to contact us if you have any queries in relation to this advice.
