By email only

Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Mid Sussex District Council planning decisions with regard to potential ecological impacts from development. Any additional information, queries or comments on this advice that the applicant or other interested parties may have, must be directed to the Planning Officer who will seek further advice from us where appropriate and necessary.

Application: DM/25/0199
Location: 189 Leylands Road Burgess Hill West Sussex RH15 8HR
Proposal: Discharge of Biodiversity Net Gain condition 1 relating to planning application DM/24/1254

Dear Stefan

Thank you for re-consulting Place Services on the above discharge of condition application.

Further information required	Yes
No ecological objections	
Recommended Approval subject to attached conditions	
Recommended Discharge of Biodiversity Gain Condition 1	No

Conditions

Biodiversity Net Gain Condition 1: Further information required

This permission is considered to be one which will require the approval of a biodiversity gain plan before development is begun (which includes demolition) because none of the statutory exemptions or transitional arrangements are considered to apply.

Comments

We have reviewed the Ilford Estate Draft Contract (undated and unsigned), Statutory Biodiversity Metric – Calculation Tool, Biodiversity Metric (November 2024), Biodiversity Gain Plan (January 2025) and Biodiversity Net Gain Assessment V2 (AEWC Ltd., January 2025) which have been submitted in order to discharge Biodiversity Net Gain Condition 1.

We welcome the submission of the Statutory Biodiversity Metric – Calculation Tool to replace the Small Sites Metric.

However, we are still not satisfied that the submitted information includes the detail required for this condition.

Unfortunately, the Ilford Estate Draft Contract (undated and unsigned) is still in draft form and does not demonstrate that agreement to purchase off-site units has been completed with a site registered as part of the biodiversity gain site register. This is required to meet the requirements of the biodiversity gain condition.

As stated in our response dated 24th February 2025, we welcome the submission of the Biodiversity Enhancement Layout (submitted 24th January 2025) with specifications and locations for a bat box, a bird box and a log stack. However, please note that enhancements for protected and Priority species are not relevant to the Biodiversity Net Gain Condition as this relates to habitats only. Therefore, this information should be submitted to meet the requirements of condition 3 of planning application DM/24/1254.

Recommendation

We are unable to recommend the discharge of Biodiversity Net Gain Condition 1 until the additional information outlined above has been provided.

Please contact us with any queries.

Yours sincerely,

Hamish Jackson ACIEEM BSc (Hons)
