Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I strongly object to the installation of this telecom mast due to the extremely close proximity to residential homes. My property is within 100 metres and the closest properties are within 50 only metres. There is also a play and exercise area used by children and local residents within 40 metres making this a totally unsuitable location. I have concerns about the possible health implications from living so close to high frequency radiation. In

addition, the mast will create noise pollution with a constant electrical hum and 12 cooling fans. This disturbance will have a negative effect on the wellbeing of local residents and the right to peaceful enjoyment of property. I'm also concerned about the visual impact as the proposed mast is twice the height of nearby trees. If approved, this will significantly harm the aesthetics of our natural landscape and be an overbearing eye sore for everyone in the local area. I trust the Mid Sussex planning authority to reject this application and work with the applicant to find a more suitable location which is away from residential homes. Thank you.

Kind regards
