Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	Formal Objection to Proposed Mast Installation near Haywards Heath Housing Developments I strongly object to the proposed location of the mast adjacent to residential developments. If the intended purpose is to service the railway network, then the mast should be sited closer to the railway line-away from homes, parks, and spaces frequented by

children.

As a regular visitor to this area, I am deeply concerned about the visual impact on the surrounding countryside. The mast would significantly disrupt the scenic views that define the character of these new communities. It would be clearly visible from my six-year-old granddaughter's bedroom window, where there is currently an uninterrupted view of the Downs.

Many families, like my own, chose to invest in this area specifically for its open landscapes and tranquillity. This development would not only degrade those views, but it risks devaluing the properties residents have worked hard to secure. Furthermore, potential health implications must be taken seriously-especially given the mast's proximity to schools, parks, and family homes. A precautionary approach is essential.

I urge the planning committee to reconsider the current siting and prioritize the well-being of local communities and the preservation of this beautiful rural landscape.

Kind regards
