| Comments:            | I feel that it is imperative to object to the siting of this mast. In scale it is huge - it would tower above the surrounding trees. It would stand just outside the boundary of a residential estate. A recent EU report on the health effects of exposure to 5G highlights serious health risks. These risks include both birth and developmental abnormalities. The mast will be pointing down on an estate full of families with young children. |

It is important to note that unlike the generality of 5G masts, this one will be pointing down, since it is for the benefit of the train line only, this means that it will be directing radiation directly at the population of the estate rather than over their roofs.

Entrance to the mast site will involve creating a very dangerous junction on a busy winding road. It is likely this will be the cause of fatalities.

A much safer location has already been identified on Clearwaters Lane.
