Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	This has been kept very quiet from the public so I feel that particularly local residents should have been better informed to give adequate time to put their views across. To have such a large mast so close to this residential area will not only be a hideous eye sore it could also affect the prices of our property. Another big concern is the constant radiation that all local residents will be constantly subjected to, taking into consideration that it will be

right by a children's play park. Where is our say in this? I'm sure if most people were made aware of the risks they would object. Most houses have WiFi so who is this really benefiting?! The benefit would give passengers of the trains a brief 5g coverage but not a benefit to local residents. Important trees would need to be removed to create space for the mast. As well as the overbearing design/ appearance of the mast to the local area. Noise disturbance is also a concern from the mast itself or equipment/ cabinets located by it. I hope these points will be given careful consideration.

Kind regards
