Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	Dear Planners, I wish to object to the installation of the lattice mast. 1. Who is the proposed development supposed to serve? Why this location? It's location next to the railway line doesn't seem to benefit anyone apart from passing trains and houses in the

immediate vicinity.

2. I have concerns over the environmental impact. Has anybody researched the environmental impact? Loss of trees/habitat to build what appears to be a long access road for a development with a small footprint. What about evidence of the effects of increased radiofrequency electromagnetic fields on health? CO2 emissions on the development. Is there any provision to offset carbon emissions?

3. The height of the mast will create an eyesore on the landscape.

4. Once again, tenuous economic reasoning seems to be more important than any environmental or health concerns.

Kind regards
